From Anywhere To Cloud

Strategic Cloud Migration

We create Strategic Cloud Migration aligned with your existing on-premise or Cloud setup. The migration process includes Applications and Infrastructure assessments.

Cloud-Native / Native-Cloud

We help customers to develop their Application Landscape architected from the ground up to run in a public cloud like in AWS, Azure, DigitalOcean, or GCP using cloud-based technologies.

Cloud Center of Excellence

Our Cloud Center of Excellence (CCoE) enables customers to develop Best Cloud Practices with Cloud Adoption, Strategy, Governance, Platform and Automation.

Serverless Architecture

We help organisations to setup Serverless Architecture so that you don't have to provision, scale, and maintain servers to run your applications, databases, and storage systems & You Pay-as-you-go.

Containerization

We build your complete Landscape with Microservices and Containerization technologies like Docker, Kubernetes, Terraform & Ansible within on-premises or cloud Infrastructure.

Cloud Architecture Framework

With Well-Architected Framework, we help customers by guiding tenets that can be used to improve the quality of a workload. The framework consists of five pillars of architectural excellence.

Infrastructure-as-a-Service

IaaS gives customers complete freedom of creating and enabling the Infrastructure within Cloud by running workload on Virtual Machines.

Platform-as-a-Service

PaaS enables and empowers developers to create their applications landscape with Development, Operation and Security (DevSecOps) approach first.

Software-as-a-Service

SaaS is a great option for small businesses to integrate and enable Cloud or Third-party Software Services within any Cloud environments.
